

MARICON JANE G. LAGUTING

Tatalon, Quezon City, Philippines • lagutingmaricon@gmail.com • 09923033890 • [LinkedIn](#) • [GitHub](#)

A Computer Engineer student from Polytechnic University of the Philippines (PUP) – Sta. Mesa with hands-on experience in AI solutions development, Retrieval-Augmented Generation (RAG), prompt engineering, and system automation. Experienced in building AI chatbots, API integrations, and IoT systems. Seeking opportunities to apply software engineering and AI development skills to real-world problems while contributing to innovative technology teams.

EXPERIENCE

Junior AI Solutions Developer | SOFI AI Tech Solution Inc. Quezon City, Metro Manila
December 2025 – February 2026

- Contributed in the system improvement of the current project regarding file content extraction, removing of PDF reader's ligatures and markups.
- Assisted in the development of FAISS in a project to optimize the AI's related file extraction using Open AI embeddings.
- Developed a real-time Google Sheet monitoring system to notify the developers if there are changes made in the database which will help in the immediate update of the file in the RAG driven system.
- Developed an AI chatbot handling 100+ automotive business inquiries through automated workflow management, system prompts, system logic mapping, and state and flow management.
- Contributed to a project by handling system prompt engineering, system logic mapping, initial conversation designing, and integration of Google Sheet API for data gathering and fetching.

AI Solutions Developer Intern | SOFI AI Tech Solution Inc. Quezon City, Metro Manila
August 2025 – October 2025

- Refined AI chatbots and conversational flows, managing prompt engineering to define persona, tone, and identity.
- Implemented complex AI guardrails and integrity rules to ensure safe, professional, and accurate automated interactions.
- Integrated Google Sheets API to enable automated data fetching, saving, and information updates within AI-driven workflows.
- Developed function-specific AI modules, including application status inquiries, job position dictionaries, and automated feedback handling protocols.
- Utilized API integrations, such as the Semaphore gateway, to enable automated SMS notifications for booking confirmations.
- Designed advanced conversational triggers and logic for diverse use cases, including customer service (CSR) workflows, booking management, and lead generation.

AI Quality Assurance Intern | SOFI AI Tech Solution Inc. Quezon City, Metro Manila
Jul 2025 – September 2025

- Performed comprehensive quality assurance (QA) testing on 10+ projects live to ensure functionality and user experience standards.
- Conducted rigorous internal and external testing, utilizing test cases to identify, document, and resolve system loopholes across 4+ ongoing projects.
- Monitored and evaluated AI performance, providing actionable feedback to developers to refine response consistency and accuracy.

- Provided real-time technical support to production agents, resolving audio hardware and peripheral issues to minimize workstation downtime.
- Executed system re-imaging and reformatting for PCs and laptops, ensuring optimal configuration for deployment to personnel.
- Managed the end-to-end lifecycle of hardware assets by performing data sanitization (Kill disk) on returned units and preparing inventory for disposal or redeployment.
- Maintained detailed 5-15 (per day) administrative records by processing and organizing Return Accountability Forms (RAF) and Hardware Accountability Forms (HAF).
- Conducted daily diagnostic walkthroughs of the production floor, identifying and repairing power, cable, and workstation connectivity issues to maintain operational standards.
- Assisted in IT office audit preparations by organizing storage systems and verifying the functionality of peripherals, including webcams, monitors, and meeting room displays.

PROJECTS

IoT-Based Health Management System with Preliminary Diagnostics for Healthcare Facilities

- Implemented RAG with FAISS vector database to enhance the related symptom retrieval over 1000+ files from both open source and the beneficiary.
- Engineered the prompt of the LLM used to improve the preliminary diagnostics.

RAG-Based AI Knowledge Assistant

- Built a Retrieval-Augmented Generation chatbot using OpenAI embeddings and FAISS vector databases.
- Implemented document ingestion, chunking, semantic search, and context-aware response generation.
- Optimized retrieval accuracy across 10+ document through prompt engineering and vector indexing.

AI Solution Chatbot

- Developed a conversational AI system for handling specific business inquiries.
- Designed workflow automation, state management, and system prompt architecture.
- Integrated Google Sheets for dynamic data retrieval and updates.

Tomas Morato Dining Hub | Software Design

- Engineered the chatbot to answer inquiries that are related to the local restaurants and cafes in Tomas Morato.

Ink and Solace | Database Management System

- Developed the relational database management system to handle publishing industry records.
- Engineered the backend using PHP and custom database architecture to ensure secure and efficient data organization.

SKILLS

- **Core Skills:** Technical Support, AI Solutions Development, System Integration and Automation, Quality Assurance, and Testing
- **Technical Skills:** Microsoft Office (Word, Excel, Powerpoint), Google Workspace (Docs, Sheets, Gmail, Drive), Software Development, AI and Data Engineering, Networking, IOT, and Hardware Engineering

EDUCATION

Bachelor of Science in Computer Engineering (GWA: 1.59)

Manila City, Metro Manila
2022 – 2026

- **Relevant Coursework:** Computer Networking, Software and Database Development, Cloud Computing
 - **Organization:** Association of Concerned Computer Engineering Students for Service (ACCESS) – Member
-

CERTIFICATES

- **CCNA 1:** Introduction to Networks, Cisco Networking Academy: 2025
- **CCNA 2:** Switching, Routing, and Wireless Essentials, Cisco Networking Academy: 2025
- **CCNA 3:** Enterprise Networking, Security, and Automation, Cisco Networking Academy: 2025
